Social Sciences #1061

DR. CAITLIN H. SCHROERING

ASSISTANT PROFESSOR
UNIVERSITY OF NORTH CAROLINA, CHARLOTTE

ABOUT THE TALK:

Dr. Schroering analyzes the global dynamics of water privatization and seizure by corporations and government infrastructure projects. Through her research on resistance to such efforts by the Movimento dos Atingidos por Barragens (MAB), she outlines activist strategies to communicate and safeguard their communities' environmental interests in the midst of rapidly escalating water crises in the Global South.
